

Electronic Prescribing at Bonum Health

To Our Valued Patients and Pharmacy Partners,

At Bonum Health, we strive to make healthcare affordable and convenient for all! Your healthcare related needs are our top priority.

When a provider determines a prescription is medically necessary through a virtual telehealth consultation, it will be sent to electronically to the patient's pharmacy of choice. Our telehealth platform is connected to the Surescripts® electronic prescribing network through our e-prescribing partner, DoseSpot.

All pharmacies are connected to our e-prescribing module via the NCPDP database. To ensure there are no issues, it is best practice to regularly maintain your NCPDP profile to avoid any issues with receiving e-prescriptions.

To find out more about these programs, and the benefits of e-prescribing we encourage you to visit www.surescripts.com.

Warm Regards,

Bonum Health, LLC
